

Covid-19 Disinfection Spraying

*Siethom Fog Cannons help to
fight against the virus.*

COVID-19 VIRUS DISINFECTION

The mist cannons spray the disinfection liquid on the streets and roads and therefore help to stop spreading the dangerous Covid-19. We can deliver only the Covid-19 Protection Cannon, or also a complete trailer with tank solution.

The smaller units (HE15 or HE30) could be used for the disinfection of the office rooms or warehouses.

The total technology consists of the fog cannon itself, some companies have added the road trailer, generator and water tanks with the additional pump.

The Siethom fog cannon will spray the disinfectant up to 30 m range.

We are glad to help to work against the Covid-19.

Main Advantages

We have a long experience to help to reduce dust in the air. Now we rebuild our Cannons to get a perfect machine to clean and reduce virus possibility on streets, buildings, official places, tourist attractions.

-  Constant product innovation
-  Requires low maintenance
-  Highly customisable
-  High durability in heavy operation
-  Simple and easy to use
